

## Standard Practice for Direct Design of Buried Precast Concrete Box Sections, ASCE 26-97

Filesize: 1.34 MB

### ***Reviews***

*It becomes an incredible publication that we actually have at any time read. It is one of the most incredible book i actually have go through. I am just delighted to tell you that this is actually the finest pdf i actually have read through within my personal life and might be he finest publication for actually.*

*(Prof. Hilma Robel)*

## STANDARD PRACTICE FOR DIRECT DESIGN OF BURIED PRECAST CONCRETE BOX SECTIONS, ASCE 26-97

To get **Standard Practice for Direct Design of Buried Precast Concrete Box Sections, ASCE 26-97** eBook, make sure you click the button under and save the file or have access to other information that are have conjunction with STANDARD PRACTICE FOR DIRECT DESIGN OF BURIED PRECAST CONCRETE BOX SECTIONS, ASCE 26-97 ebook.

American Society of Civil Engineers. Paperback. Book Condition: new. BRAND NEW, Standard Practice for Direct Design of Buried Precast Concrete Box Sections, ASCE 26-97, American Society of Civil Engineers, This Standard covers the direct design of buried one-cell precast reinforced concrete box sections for the conveyance of sewage, industrial wastes, storm water and drainage, and to serve as tunnels. The design and analysis method accounts for the interaction between the box sections and soil envelope in calculating loads, pressure distributions, moment, thrust and shear in the box section, and includes a procedure for calculating the required reinforcement. Load effects are determined separately for each loading. The structural design of one-cell precast reinforced concrete box sections is based on a limits state design procedure that accounts for strength and serviceability criteria and is consistent with the procedures outlined in Section 17 of the AASHTO Standard Specification for Highway Bridges. The design criteria include: structural aspects, such as flexure, thrust, and shear strengths; handling and installation; fatigue limits; and crack width control. The design of a one-cell precast reinforced concrete box section is based on the assumption that specified design bedding and installation requirements will be achieved during construction of the installation. Owners and engineers will find this Standard useful in preparing contract documents based on the direct design method.
