Createspace Independent Publishing Platform, United States, 2012. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.When astronomers spot a massive, rogue, deep space object approaching Earth a series of mind-bending decisions have to be made to try to save the planet from an unimaginably brutal attack. But the attack is on Earth's precious, last remaining energy reserves, not on man. The locust-like alien's planet stripping destruction soon reveals man's over-reliance on the Earth's natural resources of crude oil, atomic and metal ores. Why did the military not use a secret global defence system, ERASE, that may have avoided the contact? As the military attempt to fight back they eventually realize it is a battle they simply cannot win, and it's about to get worse. As the world is pushed to edge of annihilation and socio-economic collapse Carl Myers, head astronomer, proposes a last resort plan using a unique but untested technology that is so dangerous that it itself could wipe-out our planet and all life on Earth. In a high risk mission with the entire world at stake, Space Shuttle teams create the most awe inspiring and frightening doomsday-like act before it's too late. Will man risk the world to save the world? Paul Michael Brown's debut science fiction book is an epic, innovative and action packed story with heart ripping heroism and a smart battle of ingenuity on an unprecedented huge scale of tension and destruction on planet Earth. Hold on tight; the world is about to change.
